DELTAGEN, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR FIRST QUARTER 2008 March 31, 2008

1. Basis of Presentation

The accompanying consolidated financial statements of Deltagen, Inc. (“Deltagen” or the “Company”) for the three month period ended March 31, 2008 are unaudited, but have been prepared on an accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information.

These consolidated financial statements have been prepared so that they present fairly, in the opinion of management, the Company’s financial position and its results of operations and its cash flows for the period presented. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included.

The preparation of consolidated financial statements in conformity with GAAP requires the Company to make estimates and assumptions that affect the amounts that are reported in the consolidated financial statements and accompanying disclosures. Although these estimates are based on the Company’s best knowledge of current events and actions that the Company may undertake in the future, actual results may differ materially from the estimates.

Under our revenue recognition policy, revenues are recognized when a definitive agreement with a determinable price exists, product delivery and/or invoicing (in each case where there is reasonable assurance of meeting customer-specified criteria) have occurred, and collectibility is reasonably assured.

Cash and cash equivalents include cash in banks and money market mutual funds with a maturity of three months or less when purchased.

The Company has incurred expenditures relating to the pursuit of patent rights covering certain of its products and technologies. These expenditures have not been capitalized because, in the Company’s opinion, the probability of future benefits from such patent rights cannot at present be reasonably assessed and/or the useful life of such assets cannot be reasonably estimated.

Property and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of assets ranging from three to seven years. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expenses as incurred. When an asset is sold or retired, the related cost and accumulated depreciation are removed from the accounts and any resulting gain or loss on disposition is recognized in the current year.

The Company accounts for income taxes under the liability method. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. In the calculation of the deferred tax assets, the Company established a 98% valuation allowance due to uncertainties relating to future income and the realization of such deferred tax assets. The Company currently intends to evaluate and adjust on an ongoing basis, based on expected income, the recoverability of the deferred tax assets and the level of the valuation allowance.

For further information, refer to the financial statements and related notes posted on the Company’s website (www.deltagen.com).

2. Treatment of Subsidiaries

The consolidated financial statements include the accounts and activities of the Company's subsidiaries, Deltagen Research Laboratories, L.L.C., Deltagen Europe, S.A. and Xenopharm, Inc. Intercompany transactions and balances are eliminated in consolidation. The Company uses the U.S. dollar as the functional currency for its foreign subsidiary. Accordingly, gains and losses from the translation of foreign currency amounts reflected on the balance sheet into U.S. dollars are included in the results of operations.
