DELTAGEN, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR QUARTER ENDED JUNE 30, 2011

June 30, 2011

1. Basis of Presentation

The accompanying consolidated financial statements of Deltagen, Inc. (“Deltagen” or the “Company”) for the three-month period ended June 30, 2011 are unaudited, but have been prepared on an accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for financial information.

These consolidated financial statements have been prepared so that they present fairly, in the opinion of management, the Company’s financial position and its results of operations and its cash flows for the periods presented. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included.

The preparation of consolidated financial statements in conformity with GAAP requires the Company to make estimates and assumptions that affect the amounts that are reported in the consolidated financial statements and accompanying disclosures. Although these estimates are based on the Company’s best knowledge of current events and actions that the Company may undertake in the future, actual results may differ materially from the estimates.

Under our revenue recognition policy, revenues are recognized when a definitive agreement with a determinable price exists, product delivery and/or invoicing (in each case where there is reasonable assurance of meeting customer-specified criteria) have occurred, and collectability is reasonably assured.

Cash and cash equivalents include cash in banks and money market mutual funds with a maturity of three months or less when purchased.

The Company has incurred expenditures relating to the pursuit of patent rights covering certain of its products and technologies. These expenditures have not been capitalized because, in the Company’s opinion, the probability of future benefits from such patent rights cannot at present be reasonably assessed and/or the useful life of such assets cannot be reasonably estimated.

Property and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of assets ranging from three to seven years. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expenses as incurred. When an asset is sold or retired, the related cost and accumulated depreciation are removed from the accounts and any resulting gain or loss on disposition is recognized in the current year.

The Company accounts for income taxes under the liability method. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. In the calculation of the deferred tax assets, the Company established a 98% valuation allowance due to uncertainties relating to future income and the realization of such deferred tax assets. The Company evaluates and adjusts on an ongoing basis, based on expected income, the recoverability of the deferred tax assets and the level of the valuation allowance.

For further information, refer to the financial statements and related notes posted on the Company’s website (www.deltagen.com).

2. Treatment of Subsidiaries

The consolidated financial statements include the accounts and activities of the Company's wholly-owned subsidiaries, Deltagen Research Laboratories, L.L.C., Xenopharm, Inc. and Deltagen BioServices, Inc.

Intercompany transactions and balances are eliminated in consolidation.

3. Deltagen BioServices' Lease

Deltagen BioServices is a party to a lease for a facility in Malvern, Pennsylvania covering approximately 35,000 square feet. Base rent will be \$75,000 per month for the first year, increasing upward annually by two percent (2%). Payments of base rent under the lease will commence on October 1, 2011. In addition to the base rent, Deltagen BioServices will pay its pro-rata share (34%) of the building operating expenses (estimated to initially be \$13,000 per month). The lease runs until June 2021. Deltagen entered into a lease guaranty in favor of the landlord to guarantee payments under the lease during the first four years rent is payable. This liability of Deltagen under the guaranty is capped at \$3,800,000.
